The Full Circle project by Max Igan

The Full Circle Project includes a series of workshops, lectures and initiatives that can be implemented locally in order to empower individual communities at a grassroots level and help provide a template that can then be expanded out to include all who come into contact with it. The intention is to introduce these templates into every country on this Earth that we are able to reach.

The Full Circle Project intends to focus on local cultures, art and traditions and seeks to present keynote speakers, workshops, reforestation programs and local agricultural co-operatives with a view to reigning in the ship of state while informing our governments (public Trustees) of the new direction mankind now intends to take the world, while also offering them the opportunity to come with us under our own terms.

This is not a matter for negotiation nor petition. It is not a matter for debate. If life on this Earth is to continue, it is a matter of necessity.
